

GVW 3.8.0 Release Notes (External)

RELEASE NOTES - GVWeb 3.8

Product	GVWeb
Software Version	3.8.0
Release Date	01 Oct. 2020
Release Type	Validated

Release Overview

Release 3.8 offers an improved Text module, pertaining specifically to location differences. Furthermore, EULA agreement for users, multiple ways to cancel a running inspection, the ability to have custom profiles for Barcode as well as an improved inspection logic.

New Features

- Removing reading order correction for improved location difference detection
- Grouping of all hyphen types to one category, “Hyphens”
- Allow the user to Accept or Decline the EULA agreement
- Allow the user to cancel current running inspections
- Not allow user to inspect files without live text
- Limit a user to a set number of inspections at once to improve speed and performance
- Allow the user to select profiles for Barcode Inspections
- New report naming convention (Date_Time_Module_User)

Bug Fixes
<ul style="list-style-type: none">● Correction of inconsistency with font size for Text inspection header● Removed unwanted URL from module name in inspection menu● Correction of Text inspection report to display images● Correction of problematic files not loading in the Notes module
