

RELEASE NOTES FORM

**GLOBALVISION WEB
RELEASE NOTES (VERSION 3.3.0)**

UPDATES

- Mozilla Firefox now supported.
- Flash panel in Graphics Inspection can be resized or popped out into separate browser window.
- Master and Sample panels in Graphics Inspection can be hidden from view.
- Graphics and Text inspection views now show total number of differences (instead of ID numbers).
- Inspection Options icon replaced with Inspect button.
- Locked-out users can re-authenticate accounts on their own instead of having to contact administrator.
- Warning messages now display before accounts expire.
- Sessions time out after 60 minutes instead of 30 minutes.
- Option to email reports to third parties removed from individual file-upload screens.
- Maintenance Message window and Login, Forgot Password, and Reset Password pages have been redesigned.
- Pop-up warning messages now embedded in Login page.
- "Please contact the system administrator" message now linked to GlobalVision support web page.
- Sign-up link to GlobalVision contact page added on Login page.
- Zoning search functionality on doc/ docx files now finds matching text strings in sample.
- Text and Spelling Inspection errors now highlighted in red (instead of being color-coded).

BUG FIXES

- URL encoding for file names now supported.
- Spelling Inspection Difference List no longer misaligned.
- Warning message added for when files loaded in Graphics Inspection are unsuitable for inspection.
