

Digimarc Verify for GlobalVision

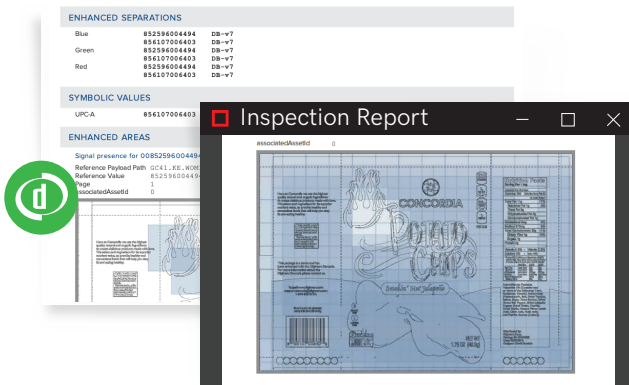

Inspect Digimarc Barcodes

Verify and grade all Digimarc Barcodes with or without the use of a scanner by automatically confirming that the Global Trade Identification Number (GTIN) in Digimarc Barcodes matches the GTIN in the UPC or EAN barcode.

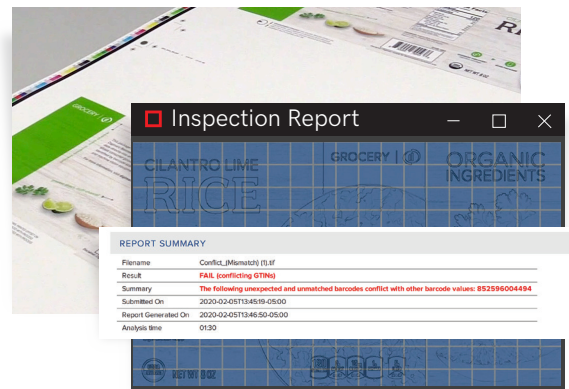

Streamline barcode quality checks

Speed up and simplify the quality control process for printers and prepress operators by catching any errors that occur when printing early on.

Sign off with confidence

Generate comprehensive inspection reports to record and review all detected differences, including the enhanced separation values. Keep track of each inspection with e-signatures for enhanced security.

Available for Print Inspection

Inspect printed Digimarc Barcodes with GlobalVision's Print Inspection system. Get color-coded grades in seconds by scanning in your hardcopy.

Digimarc Verify comes as an additional inspection tool for GlobalVision's quality control platform. For more information regarding this add-on, Contact Sales.
