**GLOBALVISION DESKTOP
RELEASE NOTES (VERSION 5.5.0)**

UPDATES

- The ability to preprocess files as they load, so actual inspections run faster.
- The ability to raster files after zooming during text/ spelling inspections, so they appear less pixelated.
- Improved Text and Spelling Inspection processing speed.
- Pop-up menus replace Level and Comment drop-downs in Text and Spelling Inspection, so Difference List loads 400% faster.
- Improved Spelling Inspection logic with regard to punctuation.

BUG FIXES

- Adobe-libraries upgrade for improved handling of layers and separation/ process color selections
- Improved logic for Braille direction detection.
- Live text with font weight of at least 500 now considered bold to prevent false positives.
